

Lumostage Stage Configurator — Measurement Sheet

Field measurements to build the 3D stage configurator to scale. Wall, rolling-wall, and ceiling panels are standard 50cm × 50cm (≈ 1.64 ft × 1.64 ft) modules — **count panels, don't measure raw footage** for those sections. Everything else is a direct measurement.

Measured by: _____ Date: _____

Units used: ☐ Decimal feet ☐ Feet & inches

1. Main Volume Wall (fixed) — panel count

Measurement	Value	Notes
Panels high	_____ panels	
Panels wide across the curve	_____ panels	
Arc angle achieved	_____ °	
Footing height off ground	_____ ft	approx 7 in / 0.58 ft — confirm exact

2. Rolling Walls — panel count

One row per wall. Add more rows by hand if there are more than six.

Wall #	Panels high	Panels wide	Track: straight / curved	Max travel (ft)	Stowed position notes

3. Ceiling — panel count + mounting height

Measurement	Value	Notes
Panels long	_____ panels	
Panels wide	_____ panels	
Height off ground	_____ ft	mounting height, not panel-derived
Fixed or adjustable?	☐ Fixed ☐ Adjustable	
If adjustable — min height	_____ ft	
If adjustable — max height	_____ ft	

4. Stage Deck (on casters) — what the rolling walls ride on

Measurement	Value	Notes
Height	_____ ft	

Measurement	Value	Notes
Length	_____ ft	
Depth	_____ ft	

5. Subway Car

Interior ceiling height and window sill height matter for the interior camera eyeline — don't skip these even if exterior dimensions are on a spec sheet.

Measurement	Value	Notes
Exterior length	_____ ft	
Exterior width	_____ ft	
Exterior height	_____ ft	
Interior floor-to-ceiling height	_____ ft	may differ from exterior
Window sill height from floor	_____ ft	eyeline reference
Door opening width	_____ ft	
Door opening height	_____ ft	
Number of doors per side	_____	

6. Station Platform — pre-configured sizes

One row per version. Add rows by hand for more than shown.

Version	Length (ft)	Width (ft)	Height off ground (ft)	Notes
v1				
v2				
v3				

7. Rooftop Set — pre-configured sizes

Version	Length (ft)	Width (ft)	Parapet height (ft)	Notes
v1				
v2				
v3				

8. Door Box (rooftop component) — pre-configured sizes

Version	Length (ft)	Width (ft)	Height (ft)	Notes
v1				
v2				

Version	Length (ft)	Width (ft)	Height (ft)	Notes
v3				

9. Notes / Additional Info

Anything not captured above — quirks, constraints, extra pieces, whatever's worth flagging.

Item	Notes

Have an existing CAD, Blender, or Unreal file for any piece above? Note where it lives and skip that section's fieldwork — send the file instead, it's more accurate than a tape measure.
