

Lumostage Stage Configurator — Measurement Sheet

Field measurements to build the 3D stage configurator to scale. Wall, rolling-wall, and ceiling panels are standard 50cm x 50cm ($\approx 1.64 \text{ ft} \times 1.64 \text{ ft}$) modules — **count panels, don't measure raw footage** for those sections. Everything else is a direct measurement.

Measured by: DS

Date: Mon Sept 28 2026

Units used: ☒ Decimal feet ☐ Feet & inches

1. Main Volume Wall (fixed) — panel count

Measurement	Value	Notes
Panels high	<u>10</u> panels	panels are 0.5 m
Panels wide across the curve	<u>36</u> panels	
Arc angle achieved	<u>50</u> °	
Footing height off ground	<u>6 3/4</u> " ft	approx 7 in / 0.58 ft — confirm exact

2. Rolling Walls — panel count

One row per wall. Add more rows by hand if there are more than six.

Wall #	Panels high	Panels wide	Track: straight / curved	Max travel (ft)	Stowed position notes
A	8	10	Free-rolling	~100 ft.	in volume
B	8	10	"	"	"

3. Ceiling — panel count + mounting height + position in volume

Measurement	Value	Notes
Panels long	<u>8</u> panels	
Panels wide	<u>10</u> panels	
Height off ground	<u>24</u> ft	mounting height, not panel-derived
Fixed or adjustable?	☐ Fixed ☒ Adjustable	
If adjustable — min height	<u>4</u> ft	
If adjustable — max height	<u>20</u> ft	

4. Stage Deck (on casters) — what the rolling walls ride on

Measurement	Value	Notes
Height	<u>13</u> " ft	Heavy duty casters

4. Stage Deck (cont'd) Rolling Wall

Measurement	Value	Notes
Length	16 ft	LED wall is longer than deck 6ft vs 5m (16'5") overhang of approx. 2.5"
Depth	4 ft	

5. Subway Car

Interior ceiling height and window sill height matter for the interior camera eyeline — don't skip these even if exterior dimensions are on a spec sheet.

Measurement	Value	Notes
Exterior length	36'2" ft	
Exterior width	8'6" ft	
Exterior height	9'8" ft	
Interior floor-to-ceiling height	6'8" ft	may differ from exterior concave, very slight about 6'7 3/8" near door
Window sill height from floor	37" ft	eyeline reference
Door opening width	4'8" ft	
Door opening height	6'3" ft	
Number of doors per side	2 double sliding doors	

6. Station Platform — pre-configured sizes

One row per version. Add rows by hand for more than shown.

Version	Length (ft)	Width (ft)	Height off ground (ft)	Notes
v1	24	16		One side - For use with physical train set
v2	24	20		Two side, full length
v3	16	20		Two side, removable

7. Rooftop Set — pre-configured sizes

Version	Length (ft)	Width (ft)	Parapet height (ft)	Notes
v1			15 3/4	low, out-of-code style
v2			40 1/2	w/ brick wall parapet
v3				
	variable based on deck choice			

8. Door Box (rooftop component) — pre-configured sizes

Version	Length (ft)	Width (ft)	Height (ft)	Notes
v1	12'1"	4'4"	10'2"	brick side or stucco side
v2				

Version	Length (ft)	Width (ft)	Height (ft)	Notes
v3				

9. Notes / Additional Info

Anything not captured above — quirks, constraints, extra pieces, whatever's worth flagging.

Item	Notes
roof parapets	low - 15 3/4"
1/2 brick wall	brick - 40 1/2"

Have an existing CAD, Blender, or Unreal file for any piece above? Note where it lives and skip that section's fieldwork — send the file instead, it's more accurate than a tape measure.
